## *Who We Are*

*We the People of Washington State* is a grass-root, non-partisan collective of individual citizen patriots dedicated to the preservation and promulgation of the United States Constitution, the principles of the American Founding, and the transmission of the American heritage of liberty and prosperity.

## *Our Vision*

The great American experiment has to this day been a question of a people's capacity to self-govern thus maintaining individual freedoms. When the balance of power between those governed and those given consent to govern becomes imbalanced, liberty and prosperity suffer. We desire that the essential balance of power, having been tipped to the side of those governing, would be restored to its optimal condition.

## *Our Mission*

In all of human history it is found that freedom is the exception, not the norm. The pillars of the American experiment and of the resultant liberty have been a civically moral, educated, and active people. Our mission is to encourage each other, our families and, our communities in these pursuits, thus reasserting civic ownership and control of our cities, state, and nation.
